Sonja Dinner of the Swiss Dear Foundation is on a mission to increase awareness and break down taboos surrounding breast cancer, particularly among women and men in the world's poorest regions. Whether they reside in Africa or a Palestinian Arab village, Sonja goes to them, speaks openly and frankly to the women and their spouses and offers them help and guidance.

The Dear Foundation has now nearly completed the filming of ***Brave Women Worldwide*** (with production assistance from Life's Door) to be shown around the world, especially in societies where women are afraid or prohibited to be examined or treated for breast cancer. Starring in this vitally important movie are a multi-cultural blend of women who have been treated and are speaking about their experiences openly and frankly – with love, dignity and joy to be alive.

These women are sending out a clear message – that there is no shame in the discovery and treatment of this deadly disease. ***Shame can kill.***

Emek professionals who have treated some of the women Sonja is committed to saving appear in the film, each speaking about breast cancer from their fascinating perspectives:

Professor Doron Kopelman, Head of Surgery 'B'

Emek CEO, Assistant Professor Orna Blondheim also spoke passionately to Sonja about this disease that crosses every political, social and religious boundary.

Emek is proud to be associated with the Dear Foundation and to be deeply involved and committed to the early detection and treatment of breast cancer.

Support Emek and join our battle to save more precious lives!
